# MORIYA SANGYO K.K.

Since its foundation over 30 years ago, Moriya Sangyo has been helping companies from foreign shores enter the growing pharmaceutical and related markets in Japan. Through the years of representing overseas business interests, Moriya Sangyo has conducted business with almost every major pharmaceutical company in Japan and has built a solid and well known reputation in the industry. Our excellent relations with these large corporations have enabled us to provide our overseas clients wishing to enter the Japanese market with the initial guidance necessary to establish themselves without the expense and difficulty of operating and maintaining an independent office. With our headquarters located in Tokyo, Moriya Sangyo is strategically poised to open the doors of corporate Japan for dynamic companies that have realized the exciting new opportunities in the pharmaceutical, medical and biotechnology fields.

# MORIYA SANGYO K.K.

Moriya Sangyo maintains contact with an extensive network of large companies for distribution and marketing of medical, pharmaceutical and other products. These Japanese companies are among the most well known and trusted names and are already equipped with a strong suit of products and sales force to promote them. A number of these companies have entrusted us with identifying new promising products and state of the art technologies that will flourish in the Japanese market.

These companies also ask us to find suitable overseas customers to export finished Japanese products to or to license out technology.

# MORIYA SANGYO K.K.

---

**Mr. Kazuo Moriya** made his mark in the pharmaceutical industry with DaiNippon Pharmaceutical Corporation, where early in his career he distinguished himself as the English interpreter for the president in negotiating joint venture and licensing agreements with overseas companies. His experience and achievements in high level negotiations have brought him the respect of top management throughout the pharmaceutical industry. Mr. Moriya independently established Moriya Sangyo K. K. (Moriya Industries, Inc.) in 1966

# MORIYA SANGYO K.K.

We also represent major overseas consulting companies in the fields of agricultural chemicals, biologicals, biotechnology, pharmaceuticals, etc. Japanese companies wishing to enter your market will require your services in research, development and licensing. We will market your services and assist you in all phases of your contract consultations with Japanese clients.
